

You know it's a great idea.

Ideas born of greatness often times die from confusion, chaos and the inability to track and control development. With our network of resources, we at PassageMaker have made it our goal to eliminate the chaos and confusion and hand control back to you. A typical trading company operates by keeping the customer in the dark, whereas our motto is "Trust & Transparency". You will always know who your vendors are, where your product is, who has your designs and what you are paying for. PassageMaker does not add a hidden mark up and resell it to you, rather we charge only for the services we perform. Our resources allow us the ability to customize any operation regardless of size, scale or global target. Whether an invention, a mature product or anywhere in between, PassageMaker is your global solution.

Industries we serve include but are not limited to:

Medical Products
Industrial Goods
Home & Garden
Agriculture
Automotive / Motorcycle / Marine
Gifts & Toys
Textiles & Accessories
...and many many more

**With a foundation of trust, transparency,
and uncommon courteousness,
PassageMaker's 3rd Party Assembly,
Inspection and Vendor Coordination
services help our customers reduce costs,
ensure quality and protect intellectual
property in China. This is a company
wide commitment.**

The Controlled Evolution of an Idea!

Our relationship can begin at any step of the process. Whether you have a great idea and just do not know where to go from there, or you have a 'mature' product and need help with manufacturing or distribution.

Our services are a bit like an a la carte menu, and can be mixed and matched to suit your project. Our goal is to provide service, either internally or through an [Endorsed Service Provider](#), at every step on the value stream, from design engineering to marketing.

Black Box to Protect Intellectual Property

China Inspection Gate to Ensure Quality

Here is a quick overview of what makes PassageMaker special:

1. We put a warranty on our work. Most trading companies, brokers and even manufacturers in China may not offer a warranty and even if they do, they may disappear before you can make a claim. Founded in 2002, PassageMaker has a successful track record and is happy to provide references.
2. We have the confidence to provide a warranty because every assembly / inspection project utilizes an industry-leading "[Product Quality Manual \(PQM\)](#)" which defines in intimate detail the quality standards, inspection methods and the assembly process.
3. PassageMaker is the first (and perhaps only) medium sized, 100% US-owned, assembly/inspection company in Shenzhen possessing the following:
 - * In-house licensed customs brokers
 - * Full import-export rights
 - * Authorized by the Chinese government to process [Value Added Tax \(VAT\)](#) rebates.
 These allow us to avoid all middlemen, protect sensitive documentation (such as identities of buyer and shipping destination) and ensure our pricing to customer receives the maximum amount of VAT rebate possible.
